

# Serving Our World

## Special Update Sowing Into The Lives Of Others

### NORTHEAST THAILAND

The projects are really transforming not only in shape, but in physical size. Here what used to be a rice patty is now love in action with the *Good Life Home*. **YES!** To be completed in the fall of 2005. We have now hired a lovely family that will be the directors and oversee the *Good Life Home*. This facility will provide children with health, education and daily needs, which will assist in fulfilling the dreams of each heart. Teams go out and teach English and share the joy of being involved and having a vital part with the **Serving Our World** family. No matter where you live it ADDs up to success when you become a family member.

**ONE  
+  
ONE  
=  
CHANGE**

### SOUTHERN TSUNAMI AREA

It is a real blessing to see the progress that is being made, not because of Gwen and I, but people like yourself that have caught the vision and decided to make a commitment to regularly support and impact boys, girls and families in need. Just take a brief flash through the team work that started with a natural disaster and now is a living witness to love in action. Getting involved adds up to fantastic changes that will continue to impact lives and mold new futures.

What a precious time we had in the village as we fellowshiped together with the families and friends at the dedication service. How could this all have happened if **ONE + ONE** wasn't working? People like you and I connecting with those hurting and without hope. These families all shared at the Sunday service and one woman commented, "I'm living in a dream". Her new home was for her a dream come true.

It is not about you and me, but together, showing love and stepping in to make a change in others.

### Tsunami Area Children

Some of the greatest rewards for us were to see our children that have been added to the **Serving Our World** Family and the joy of meeting and playing with them one on one. From children who have been left by parents, to those living in desperate circumstances and lastly to those whose parents are considering selling them. They now enjoy the love and security and daily prayers that bring peace and comfort. WOW! What a beautiful sight to see children joyfully playing. It is all worth being added to the extended **Serving Our World** Family and becoming a member.

Anna's story is one that is so common in the village where **Serving Our World** and you serve. With no father and abandoned by her mother she is in the midst of poverty and despair. What would become of her without some ONE reaching out to provide a solution?

Anna's life is changing because of **Serving Our World** family members. She's involved in our outreaches and activities regularly and will live in the Good Life Home. She has been given a new future by people like you, giving whatever they can each month.

### New Village Outreach Begins In East Timor

All that is happening is a testimony to what can be accomplished when we are daily trusting. We are committed to do all we can for the poor and needy and now we have opened a new outreach project targeting 100 children in a mountain village in East Timor, bringing meals and education programs to this remote village. Yes, reaching out with an open hand to bless others is what **Serving Our World's** vision is. That is what has been done by others who one by one connect with **Serving Our World** to continue to strengthen the life giving message and education outreaches to those who come across our path.

As you give today, 100% goes to change someone's tomorrow. Add yourself to changing lives.
